

Ceiling Mount Extension Pipes

Effective July 15, 2013

ICW changed the **thread** on extension pipes for ceiling mounts in order to make our mounts stronger and stiffer.

The thread of extension pipes after July 15, 2013 is **not compatible with pipe caps prior** to that date.

The change affected these mounts:

- Titan Elite Ceiling Mount
- Single Elite Ceiling Mount
- UL95 Ceiling Mount
- UL500i Ceiling Mount

If you need to replace an extension pipe, here's how to know which thread you need:

- Look inside the pipe. Extension pipes sold after July 15, 2013 have a **honeycomb structure** on the inside. Previous pipes were **smooth** on the interior.
- If you are replacing an extension pipe sold after July 15, 2013, you will also need to **purchase pipe caps** for both ends. All other parts of the mount are compatible.

If you need the old style of extension pipe, we have the parts available.
