

ULTRA 95 CEILING MOUNT INSTALLATION

ICWUSA.com, Inc.

If you have any questions please call Toll Free 1-800-558-4435

▶ **MAXIMUM MONITOR WEIGHT: 18 LBS (8.2 KG)**

MOUNT CEILING PLATE

Firmly secure ceiling mount to solid ceiling joist using four #14 wood screws found in hardware bag, being sure mount is level. Be sure to loosen set screw before attaching pipe.

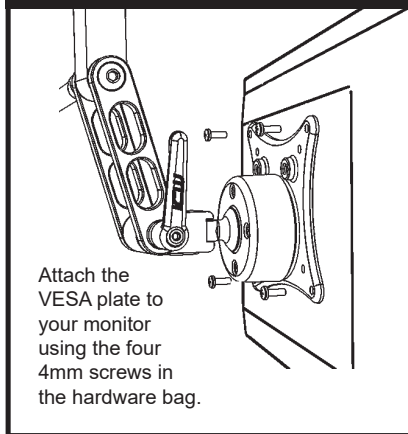

ATTACH PIPE TO CEILING PLATE

Thread pipe into ceiling mount and tighten set screw.

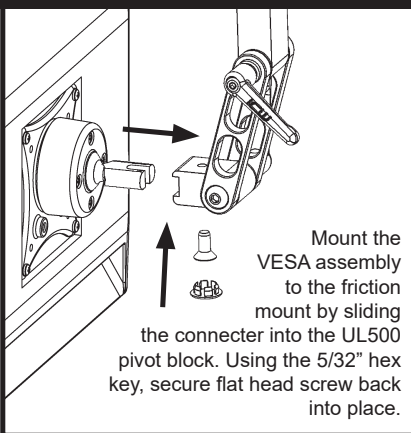

ATTACH VESA TO MONITOR

Attach the VESA plate to your monitor using the four 4mm screws in the hardware bag.

ATTACH VESA TO UL95

Mount the VESA assembly to the friction mount by sliding the connector into the UL500 pivot block. Using the 5/32" hex key, secure flat head screw back into place.

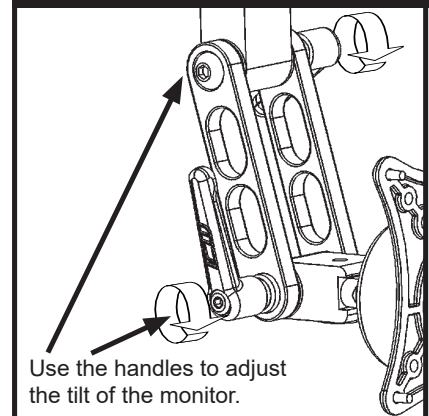

ADJUST MONITOR HEIGHT

Adjust monitor height by loosening set screws, raising monitor to correct height then tightening set screws.

ADJUST TILT HANDLES

Use the handles to adjust the tilt of the monitor.

CLEANING OF THE ICW MOUNTING DEVICE

When cleaning your ICW mounting unit please follow the points below. Proper cleaning of the mounting device will help assure proper function and extend the life of the unit.

1. Any general cleaner is acceptable except degreasers are not recommended near the bearing entrances.
2. Spray cleaner or water on a soft cloth or paper towel and then wipe down the mounts.
3. Do not spray directly at the bearing seams (located at all swivel points) as this could reduce the life of the bearings.

NOTICE: ICWUSA.COM, Inc. provides the appropriate hardware fasteners to match the majority if not all standard monitors and devices. It is the responsibility of the installer / integrator to ensure that the screws and fasteners have the adequate thread engagement. The rule of thumb is that the thread depth is greater than the diameter of the hole or 4 full turns of 360 degrees of thread engagement. It is also the responsibility of the installer / integrator to ensure that they do not damage the monitor or device by using a screw or fastener that is too long for hole and therefore damaging the unit by inserting too far.
