

ICWUSA.com Product Bulletin

The purpose of the ICW Product Bulletin is to share interesting solutions using ICW products. Watch for new bulletins by issue number and date. Past issues are available on our website: www.icwusa.com/product-bulletins/

Only ICW Can Bring You “Inverted Mounts”

Standard Mount

Inverted Mount

Only ICW can give you standard or inverted mounts.

While standard mounts are designed to link extension arms to the top of the wall ear, inverted mounts attach arms to the bottom which opens up more options to further perfect your mounting solution and workspace.

Inverted wall mounts have long been a product feature at ICW. In fact, ICW is the only mounting solution company that offers the option for both standard and inverted mounts.

Inverted mounts offer the following features:

- Allow for lower height articulation on wall mounts
- Superior ergonomic choices
- Are able to be mounted higher on the wall to avoid chair rails or decorative wainscoting
- Create more available “real estate” on walls
- Better overhead clearance for ceiling mounts
- Better positioning for under-cabinet track mounts

Inverted mounts are offered on most ICW products. For more information, contact your friendly ICW product specialist by emailing sales@icwusa.com or calling 1-800-558-4435.
