Ultra Pole Mount configuration for a Baxter DoseEdge Medication Delivery System in a pharmacy clean room. The mount holds a touchscreen monitor with scanner and Zebra printer.

(Top) Elite 5221 Asymmetric mounted on an Armstrong medical supply cart. This allows the cart to be used for both supply distribution and charting. (Bottom) Tablet Mount on overbed table.

(Top) Dual monitors and frame-mounted CPU mounted used with a fetal monitor cart. (Bottom) MD Arm with Paralink, monitor and keyboard mounted on a Draeger anesthesia cart.

Mount custom and OEM products to any ICW arm

Ultra 180 & 182

The most versatile short arm in the world. Available in all our mounting options.

Elite

Effortless movement and maximum reach. Available in all our mounting options.

MD

The best counter-balanced arm available. Wall and wall track mounting options.

Ultra

Move components independently. Wall, track and desk mount options.

Titan

Strong and versatile. Available in all our mounting options.

The Ultra arm is protected by U.S. Patent 9,243,743

Define, create and test your mounting solution

Work directly with ICW's in-house engineers to develop your ideal mount

Durability you can depend on

- Our mounts are used extensively in healthcare, dental and manufacturing/industrial environments across the USA, Canada, Australia and Europe.
- We construct our mounts using heavy duty internal and external components for long life.
- ICW mounts are finished with tough powder coating that's easy to clean and resistant to chemicals.

We'll engineer a fully custom mount to meet your unique challenges

- **When you have a specialized device mounting challenge,** ICW will work with you to create a solution that's effective and easy to use.
- **Our in-house design, engineering and manufacturing** enable us to produce custom mounts for any device.

Get the mounting solution you need, when you need it

- **You won't have to send your work order overseas and wait two weeks for an answer.**
- ICW mounting solutions are designed, engineered, manufactured and assembled in our Medford, Oregon facility to the highest quality standards.

Anesthesia cart with dual monitors, scanner and service tray mounted on a pair of ICW's heavy duty Titan Arms. This configuration provides a complete workstation and stows compactly.

SonoSite S-Fast Ultrasound Machine and mini keyboard mounted on ICW's Elite 5220. This setup can be shared between two trauma bays in the Emergency Department.

VT21 Low Profile mounted into a cabinet. Shown in the stowed position. Stowed depth 4" (10 cm), extended depth 17" (43 cm). The WorkSurface Tray provides a generous surface area for tasks. The VT21 series is available in three models: VT21, VTLP and VTTM.

Mounts are available in these 5 standard colors and 9 custom colors.

ICW's **White** and **Black** finishes are writable with dry erase markers.

Overhead arm with 77" (196 cm) of reach and exceptional range of motion.

(Above left) VT21 workstation mounted in a corridor. (Above right) VTTM Tandem Arm mounted on a track. Arms are extended showing the Mini PC mounted to the back of the unit.

Case Study: Limited cabinet space required a creative solution

Customized arms for Centura Health solved a difficult mounting situation

Above the shelf, an Inverted Ultra 180 with two AS1 extensions hold the monitor and a Mini-PC. Below the shelf at the rear of the cabinet, a second Inverted Ultra 180 with one AS1 extension hold the keyboard tray.

CHALLENGE: Install a monitor and keyboard into a small cabinet.

- The monitor needed to have vertical movement and horizontal reach, and stow compactly.
- For the keyboard, very small cabinet dimensions required a compact mounting arm that could stow completely inside the cabinet, yet reach beyond the cabinet face.
- The high location of the mounting shelf required an arm that could adjust downward to provide proper ergonomics for the keyboard.

ICW's CUSTOM SOLUTION

After defining the objectives, a customized solution was created using ICW's modular components. These components provided a compact solution with the essential horizontal and vertical adjustability in addition to reach.

- The monitor was mounted above the shelf using an Inverted Ultra 180 and two AS1 extensions. This configuration enabled the monitor to be pulled out when needed, raised, lowered and rotated as desired, then stowed compactly inside the cabinet.
- The keyboard was mounted below the shelf with an Inverted Ultra 180 and one AS1 extension. This configuration provided reach, horizontal rotation and 16" of vertical adjustment, creating the desired ergonomics for users of the keyboard tray. When not in use the keyboard tray stowed completely inside the cabinet.
