

QUICKLINK CEILING MOUNT INSTALLATION

ICWUSA.com, Inc.

If you have any questions please call Toll Free 1-800-558-4435

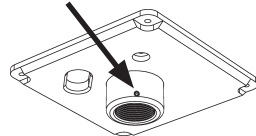

MOUNT SQUARE CEILING PLATE

Using four 1/4 x 2" lag bolts provided in hardware bag, secure ceiling plate to a solid wood surface or ceiling joist. Use square pattern or inline pattern. Be sure to use all four bolts.

Wire management holes

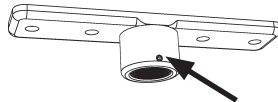

Run wires through center hole or wire management port. Loosen set screw BEFORE attaching extension pipe.

Loosen the set screw in ceiling plate before attaching extension pipe.

MOUNT INLINE CEILING PLATE

Firmly secure ceiling mount to solid ceiling joist using four #14 wood screws found in hardware bag. Be sure mount is level.

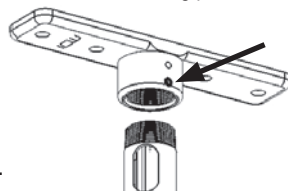

Loosen the set screw in ceiling plate before attaching extension pipe.

Loosen set screw BEFORE attaching extension pipe.

ATTACH PIPE TO CEILING PLATE

Thread pipe into ceiling plate and tighten firmly. Tighten set screw AFTER arm is attached.

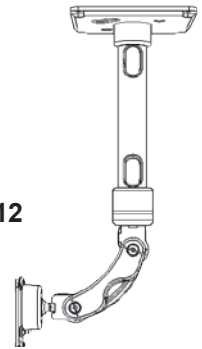

Tighten set screw after pipe is firmly screwed into ceiling plate.

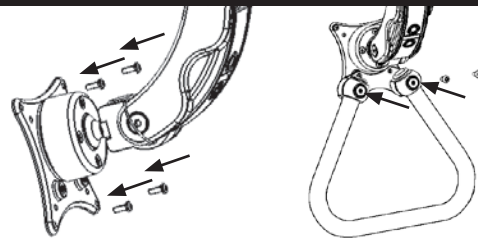

DO NOT loosen upper screw.

▶ **MAXIMUM LOAD CAPACITY**
10-25 LBS (4.5-11.3 KG)

UL560i-C8X12

ATTACH VESA AND HANDLE TO MONITOR

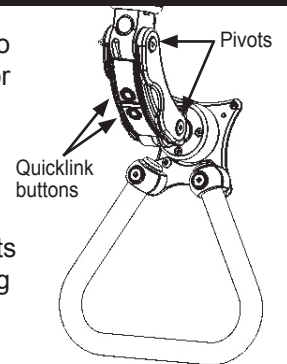

Using a Phillips screwdriver, attach the VESA plate to the back of the monitor using four 4mm screws in the hardware bag. Attach handle to VESA plate with 1/4-20 furniture nuts using a 7/32" hex wrench.

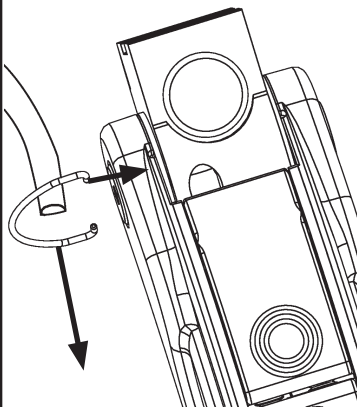

ADJUST QUICKLINK TILT

Use the under-monitor handle to rotate, tilt and swivel the monitor to desired position.

Increase range of motion by depressing buttons on back of Quicklink. Each button provides 90° of adjustment for its corresponding pivot. Depressing both buttons at once provides 180° of adjustment.

QUICKLINK WIRE MANAGEMENT

NOTE: The two clips provided can be installed on either the right or left side of the Quicklink.

- Hook one end of the cable retainer clip into opening on Quicklink.
- Route cables through the clip.
- Hook other end of the clip into opening on opposite side of Quicklink to secure cables.
- Repeat for second clip.
