DBS Series Medical Device Mount Swivel

The Medical Device Mount Swivel (DBS series) is designed to help the user achieve an additional angle of tilt in any direction needed.

This solution solves any tilt or angle viewing issues. It is especially effective with heavier devices that may drift or lean.

The DBS series is a close cousin to our popular EV65 and can mount on any Ultra arm mounting solution. It can be added at the time of ordering or as a replacement subassembly for your existing mount.

For more information on ICW solutions, please email sales@icwusa.com or call 1-800-558-4435 to speak to one of our product specialists.
