Cardiac Perfusion Medical Station with Ultra 180 Workstation

The mobile cardiopulmonary bypass machine cart above features ICWUSA's patented Ultra 180 arm and pole mount which help support the computer and keyboard workstation. The workstation also features the KUB keyboard, which has an ergonomic poly wrist rest.

Enhancing medical carts with custom mounts is a specialty of ICWUSA.com, Inc. — **and that includes all types of cardiac perfusion stations.**

The medical cart pictured above, equipped with a cardiopulmonary bypass (CPB) machine, is able to support the weight of an entire computer workstation because of ICWUSA's patented Ultra 180 arm attached to the base of one of cart's poles.

Not only does the Ultra 180 arm and pole mount combination support the full weight of the computer monitor and keyboard workstation, it provides a stable and sturdy surface that articulates and easily adjusts to the position of the user.

When the computer workstation is not in use, it can easily be shifted aside or stowed out of the way using the convenient ergonomic handle beneath the keyboard.

The Ultra 180 arm's internal wiring and ICWUSA's powder coating not only make the workstation more durable and protect its cables but both of these features make the sanitation process more efficient and less troublesome.

For more information on how ICWUSA can enhance your workspace, contact our friendly product specialists by emailing sales@icwusa.com or calling 1-800-558-4435.
