The purpose of the ICW Product Bulletin is to share interesting solutions using ICW products. Watch for new issues by issue number and date. Past issues are available on our website: www.icwusa.com/product-bulletins/

Custom-Designed Mounting Solutions in Front of Glass Windows

ICWUSA.COM, Inc. can devise mounting solutions for all spaces. In what would usually be considered unusable space, this custom-built “pipe-over-glass” installation shows computer stations mounted in front of windows. These mounts can move both horizontally and vertically, and have stop pins to prevent the mount from coming into contact with the glass. These mounting poles can hold multiple monitors, keyboards, computers and devices. This application is for an anatomy laboratory at the University of North Texas.

This style of mounting solution could be an excellent fit in public areas, government facilities, hallways, schools, hospitals, conference facilities, airports and other transportation facilities. This installation was professionally installed by IRG installations (www.installresource.com) based out of Phoenix, Ariz.

For more information on ICW mounts, please email sales@icwusa.com or call 1-800-558-4435 to speak to one of our product specialists.
